DS

“*Bear was our first child. She was a mighty huntress (well at least she thought she was). She was a retriever in a previous life because man she loved to play fetch. She was stubborn and a diehard—truly living up to her Scottish Terrier breed. She ate anything and everything—including couches, tables, visors, shoes, boxes of chocolate, SOS pads, and super expensive toys. She was so patient with our son and didn’t get too grumpy about the ear pulling and chasing. Her favorite place was the doggie beach in Perdido Key. She taught me a lot about love, patience, and veterinary medicine. Her presence in our home and hearts will always be missed.*”
