“ I got Dottie when she was just 5 weeks old. She was rejected from a breeder trying to sell her to a pet store being the runt. She got no bigger than 8lbs so she was a tiny lil thing. She quickly became a momma's baby and went everywhere with me. She was my companion during many surgeries laying right beside me. She thought she was the size of a great Dane and backed down from nobody. She was a ankle biter but became better about that. She lived a healthy and happy life. When she was about 14 her hearing and eyesight got bad. We believe she was experiencing dementia. She would bark at the air and snap like someone was there. Dottie was a few months shy of 16 yrs old. It was so hard to say goodbye to my precious baby but I will see you later <3

I know your brother Izzy met you at the rainbow Bridge to greet you seeing he passed only a few months before at 17 yrs old. Run and play my babies while we hold the fort down here. Love you Dottie!
