AV

“Dory Gene Venable lead a very eventful almost 12 years with her dog momma and all her friends. She got up every single morning and went work. She greeted ever client that walked in the door with a wagging tail and high fives. She helped calm anxious dogs by just being next to them. She was a big comforter. She loved every single dog and kitty that ever crossed her path. She was always the calm one in any situation. She stood lovingly by her Momma's side every single day of her life. She hated closed doors and had to be in the middle of every room so she could keep an eye on everyone she loved. She will be forever missed and truly loved.
