“ We rescued Izzy when he was about a year old. He was skin and bones. He was scared of everything and especially men with hats. He has been apart of our family for the last 16 years. He has been with us during middle & high school with our son. He was there for Zachs graduation. Our daughters 20's and 30's. He was here for boot camp, his brothers 7 years in the Army and when he was discharged. He was here for our 1st grandbaby Oakley and through so many family trips to the beach and all of our camping years. He loved his daddy and when we made our car trips he had to ride in his daddy's lap. He loved sleeping in the back of my knees and he was a big cheese lover. Heck he loved any treat and if you said the TREAT word you better have him something good. We are so thankful you came into our life and we all will miss you something terribly Izzy. Your furbaby sisters and brothers all miss you too. Thank you for all of the love and kisses you gave us freely and now the time has come for you to run free at the rainbow 🌈 bridge.
