

## Katie Deal

February 26, 2026

Katie is a Multipoo more Maltese than poodle as she looked like a Maltese. She got my attention at 7 weeks old when I saw her picture sitting next to a large Coke cola cup which was bigger than her. Her little nose had a white spot and she had tan tipped ears. I fell in love and went to get her. When I picked her up she immediately climbed up my chest to my ear and started kissing me. We spent the next 12 years almost two months together. She was my shadow no matter where I was in the house she was there. We traveled across the US coast to coast at least 7 times and she would never make a sound except when we stopped for potty & water breaks. She slept in more hotel rooms than most people, went potty in more states and saw more things in her life than a lot of people do. She was the love of my life and was always ready to play or rest. I will always have her in my heart and mind forever.
