

Stark Jimerson

February 22, 2024

We had the honor and pleasure of adopting Stark 8 years ago when Limestone County had a huge rescue of a bunch of dogs from a owner that they were seized from.

At the time we met him, his name was Dozier.

He was guessed to be between 7 and 9 years old and was standing alone in a cage. ...

Just watching everybody walk by. When my husband approached the cage, he stood up and reached out and that was all she wrote. We brought him home and renamed him after our favorite t v show Game of Thrones and our kids wanted us to name him after a marvel character , so Stark fit the bill for both!!

He came to us house broken and neutered, and was by all classifications , the perfect dog. We had 8 amazing years with him until he developed dementia.

Dog dementia is not easy to witness but we loved him through it best we could until he became incontinent, with wandering, and he would just get lost and forget who people were. We knew when the time came what we were supposed to do and my husband, who was his best buddy, stayed with him do every step until his heart stopped beating.

There will never be another like him. And we are so thankful for the 8 years that we had with him.
